NEW PORTaPiT GENERATION X POLE VAULT LANDING SYSTEM

A leading provider of landing systems used in many International Competitions, PORTaPiT, continues to lead the way in landing system technology!

The New Generation X Landing System design provides the following performance features:

- Increases the landing area beyond the crossbar an additional 1' to 2' over any other brand. (Safer Landing)
- Provides a Coaches box to determine vault landing parameters included in the base price. (A great Coaches Aid)
- Expands the landing "safe area" area just beyond the crossbar more than other brands. (Potential better jumps)
- Angled base protector pads for added athlete protection, which virtually eliminates pole, bend disruption as other brands promote. (Higher Jumps)
- Optional Thick Box Collar protection as well as optional additional box protection with the Hock Box Protector. (Safer training)
- Exclusive Waffle contoured air/foam system far exceeds the foam to air ration other brands promote. This is the most sophisticated system on the market. (Waffle system has less glue joints for longer life.)
- 5-year Limited Warranty (not prorated like others 10 year warranties)

PREMIER GENERATION X POLE VAULT LANDING SYSTEM OUR FINEST POLE VAULT LANDING SYSTEM

FEATURES

- Exceeds New High School NFHS, NCAA® and IAAF Specifications
- 22'W x 18'D of landing area behind the vault box
